Final Phase & Project Results

The In-DigiT project is entering its final phase, marking an exciting milestone after months of collaboration, testing, and development!

PROJECT RESULTS NOW AVAILABLE

We are pleased to share that the project's main resources are now online and ready to explore.

The **In-DigiT Training Course** includes **10 learning modules** focused on the 7 Responsible Digital Qualities. To provide an engaging learning experience, the course combines videos, podcasts, and downloadable PDF learning materials.

Visit <https://mygreentrainingbox.com>, log in and start learning!

In addition, the project offers two interactive digital escape games: **Clockwork City** and **Time Traveling Hackers**, which allow users to explore responsible digital development through practical challenges and immersive storytelling.

Discover them on the project website:

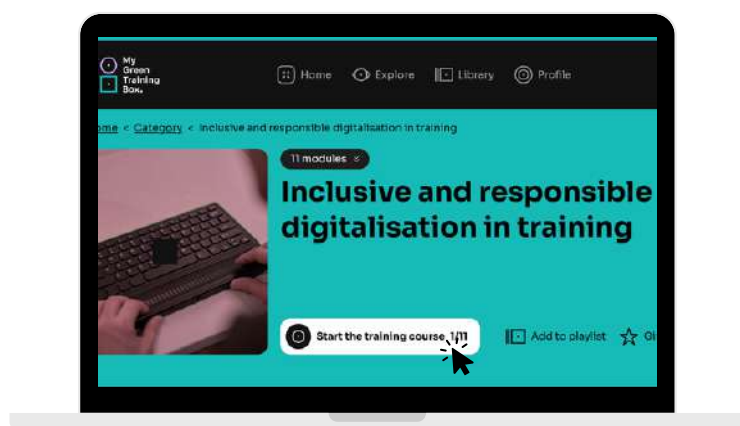

<https://indigit.sustainable-digital-learning.com/onlinegames.html>

Don't miss the **other project results:**

- the **Self-Assessment Tool**, designed to help learners reflect on their digital habits and identify areas for growth.

<https://indigit.sustainable-digital-learning.com/selfassessment.html>

- The **Booklet of 50 EU Sustainable IT Best Practices for Education & Training** with best practices, interviews and case studies to adopt digital solutions that are more respectful of the principles of digital sobriety, inclusion and social responsibility.

What's Next: FINAL EVENTS ACROSS EUROPE

Save the date!

As the project approaches completion, partner organisations are preparing a series of **Multiplier Events in all participating countries**.

Some events, including the one organised in Belgium, will be held online, creating opportunities for a wider audience to discover the project's results and resources.

We invite educators, trainers, learners, and stakeholders to explore the available materials and join us in celebrating the achievements of the **In-DigiT project**.
